

Microsoft Dynamics 365 Business Central Consulting

Deliver meaningful business change with a single solution

- Are multiple versions of truth clouding visibility of your business performance?
- Is the lack of end-to-end visibility across purchasing, stock and warehouse management preventing you from responding to market demands swiftly?
- Do your business operations depend heavily on manual processes to complete your financial accounting?
- Are you struggling to track and foresee financial performance data in real-time?

Intellint empowers businesses to realize process efficiencies, improve workforce collaboration and manage routine business operations at scale with Dynamics 365 Business Central. Our team will consult, implement, upgrade, and support you through your enterprise journey.

Service Offerings

Business Strategy

End-to-end Implementation

- Define a holistic solution roadmap that addresses the unique challenges of your business
- Venture beyond technologies to ensure strategic priorities, business processes, people and culture are aligned to guide your enterprise through seamless change management

- Assess the current and future state of your ERP implementation with an ERP transition health check (Roadmap, data migration assessment)
- Develop and deploy add-on applications and industry-specific solutions to meet unique business needs
- Provide a complete overview of your business with easy-to-create dashboards and built-in analytics

Quick-start Implementation

Upgrades

Analytics and AI

- Quickly implement the core functions of Business Central
- Leverage an accelerated time phased approach to effectively get the base functions up and running

- Manage the health of your ERP to ensure there are no roadblocks as you transition from Microsoft Dynamics GP, Microsoft Dynamics NAV, Microsoft Dynamics SL, Microsoft Dynamics 365 Business Central (on-premise) and QuickBooks

- Transform your data to drive understanding, reveal actionable insights, and personalize experiences for your stakeholders

Managed Services

Automation

- Offer proactive support with D365 Business Central management to ensure application uptime and peak efficiency
- Optimize the D365 Business Central to go beyond the core solution through industry-specific add-ons that deliver end to end productivity

- Automate complex business processes by developing automated workflows and seamlessly integrating with different data connectors and external applications

Technologies we work with

Dynamics 365
Business Central
