

Enterprise and Data Solutions

Building simple yet powerful digital transformations and analytics that matter

- Do you work with multiple versions of the truth that make it impossible to monitor your business KPIs?
- Are you looking to visualize future business performance by leveraging predictive analytics?
- Are you looking at freeing up your resources and boosting efficiency to drive a competitive edge?
- Are you struggling to track and foresee financial performance data in real-time?

Intellint provides technology solutions to transform business operations with Microsoft business applications and business intelligence to deliver an impact on our customers' digital journey, empowering them to innovate, optimize and streamline their business processes.

Service Offerings

Enterprise Resource Planning with Microsoft Dynamics Business Central

- Transform your business by automating processes, integrating systems, and deriving business insights
- Empower your business to realize process efficiencies, improve workforce collaboration and manage routine business operations at scale with Dynamics 365 Business Central
- Leverage our full-stack Dynamics 365 Consulting services to implement, upgrade, and support your business through its enterprise journey

Data and Analytics

- Develop your organization's data strategy, build data platforms and drive your business towards the future, with predictive analytics
- Eliminate the need to work with multiple disparate systems, excel sheets or several other data sources.
- Drive business intelligence and advance analytics across your organization, transforming your data journey with next-gen intelligent analytics

Our Customers

We feel extraordinarily confident about our partnership with Intellint. Their background and experience speak for themselves, and we look forward to working with their team on our digital transformation.

President
DQE

Intellint's business intelligence platform has elevated our business through 360° visualization of operations and has helped to make swift data backed decisions. Not only are we saving time and resources; but our staff feel empowered to make various strategic decisions with data at their fingertips in real-time.

Toyota

Why Intellint

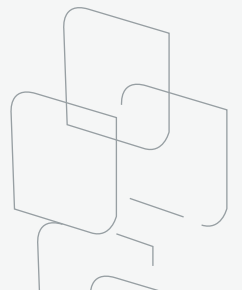

Intellint is a Microsoft Gold Partner for Data Analytics and a trusted Microsoft Dynamics 365 Business Central and the Microsoft Power Platform implementation partner that offers services covering the entire spectrum of your entire digital transformation journey.

With 40+ years of collective industry experience, we have been helping clients to accelerate their business productivity, build deeper customer relationships, streamline the sales process and stay on track with Dynamics 365 Business Central. We can do it for you too.

Our expert team, which includes a Microsoft Most Valuable Professional (MVP), is certified in the latest technologies and can help unlock actionable insights and better outcomes for your business with superior BI technologies.
